MyAssociation.xml Martin, that's exactly what I need. The MDGEOGUIDE database of building type codes, has been completely updated for release version 2015. The "META.guild.xml" file is automatically created by the installer after the first update. To be completed:- All guild* object types are supported, including the new automatic city and building type objects. To be Completed:- All the building "description" parameters have been updated to have a unique MDGEOID value. To be Completed:- All city and guild* object types have been tested with the generator and the generator has been modified to ensure that the object types are generated properly, even with guild* object

types. It will be a fair amount of work as there are more than 300 object types in the new release. Please post any questions that you may have in the forums at Martin MyGuild.net Martin, that's exactly what I need.
